KEY FUNCTIONS

Remote Battery is a C2032

LED RECHARGEABLE BATTERIES (included)

- The **rechargeable** batteries need to be inside the LED even when you are running it off the the cord/outlet (the batteries complete the circuit). The batteries will also be charging when its on and being used with the cord/outlet.
- The **rechargeable** batteries may need to be charged for up to 2 hours prior to use without the cord/outlet. A two hour charge should provide you around 6 hours of wireless use.
